NEW INNOVATIONS IN
MACHINERY AND EQUIPMENT
USED FOR MANUFACTURING PU PANELS

ABSTRACT

The Indian PU panel market is experiencing a significant shift from predominantly dis-continuous to continuous panel manufacturing. This webinar will provide insights into the latest technologies for both types of panels, machine configurations, and process flow. We will also cover innovative advancements and solutions for common machine and process challenges. Whether you are a new entrant looking to select the right technology or an established manufacturer seeking to stay updated with industry developments, this session will equip you with the knowledge and tools needed for success

Mr. Ashok Kandalkar
